MATERIAL

Made of spruce wood. The surface of the board is coated with melamine resin, which acts as a barrier against moisture.

Weight: 18 kilos per plate

Dimension: Per plate 2x1x0.027 m

Transport: 40 plates per pallet 22 pallets per truck

UTILISACION

A standard three-layer yellow formwork board is a three-layer plywood board.

It is characterized by its stability, bending resistance, and load capacity, thanks to the arrangement of the layers with the wood fibers oriented alternately.
